

## BridgeWave to Provide Wireless Backhaul Video Surveillance Support for Super Bowl XLIV and the 2010 Pro Bowl

*BridgeWave and Aware Digital Team Up with Local and Government Law Enforcement Agencies to Supplement Public Safety*

February 03, 2010 08:03 AM Eastern Time

SANTA CLARA, Calif.--([EON: Enhanced Online News](#))--BridgeWave Communications, the leading supplier of gigabit wireless solutions, today announced that its [AR80](#) gigabit wireless gear is providing the network backbone to support video surveillance traffic during Super Bowl XLIV, on Feb. 7, and the 2010 Pro Bowl on Jan. 31, taking place at Sun Life Stadium in Miami, FL.

To ensure the highest level of public safety for more than 75,000 attendees at Super Bowl XLIV, local and government law enforcement agencies, including the Miami Dade Police Department (MDPD) Homeland Security Section, the FBI, and the Miami Dade County Fire Department, have deployed the latest high-tech video surveillance systems to monitor everything from crowd control to potential terrorist activity. Additionally, the system will play a critical role in aiding first responders to any incidents throughout and around the venue.

Aware Digital, a leading provider of IP-based video surveillance systems, was tasked with delivering a solution that would provide the best quality and highest frame rate to all the agencies involved in the most flexible and efficient manner possible. BridgeWave's [AR80](#) was selected to provide the backhaul network, driving video traffic from the IP-based cameras back to the central command station.

"The BridgeWave solution was deployed in order to provide the absolute highest quality and highest frame rate video coverage and deployment flexibility for the Super Bowl, a worldwide event," says Joshua Mann, president of Miami-based Aware Digital.

In addition to its portable design, which allows for quick deployment, the [AR80](#) offers ultra-high capacity gigabit Ethernet speeds to handle the large volume of video traffic expected for these events. Also, the ultra-low latency afforded by the [AR80](#) allows law enforcement officials to operate the full pan/tilt/zoom IP-based cameras without any degradation to the quality of the images.

"BridgeWave is pleased to be a part of the team providing reliable and flexible video surveillance backhaul support for the Super Bowl and Pro Bowl events," said Amir Makeff, president and CEO of BridgeWave. "In recent years, more law enforcement agencies like Miami Dade County Police are realizing the need for products like ours as an essential piece in the deployment of video surveillance systems."

### About Aware Digital, Inc.

Aware Digital provides unique and advanced IP video and wireless solutions to customers in the Law Enforcement, Government and Commercial markets. The company has provided security solutions for many high profile events such as the Pro Bowl, NASCAR Championship, United States Conference of Mayors and others. Aware Digital provides a broad range of flexible solutions in order to meet the continuing challenges of its customers. For more information please visit [www.awaredigital.com](http://www.awaredigital.com).

### About BridgeWave Communications

Founded in 1999, BridgeWave Communications is the leading supplier of outdoor Gigabit wireless connectivity solutions. The company's exclusive [AdaptRate™](#) and [AdaptPath™](#) technologies combined with its advanced Forward Error Correction capability deliver the highest availability at the longest distances for full-rate gigabit links. BridgeWave's point-to-point, wireless solutions are widely deployed in mainstream enterprise and service provider network applications and are poised to play a key role in the migration to [4G mobile network backhaul](#). With the largest installed base of GigE radios worldwide, BridgeWave delivers the highest levels of product quality and reliability. For more information, visit [www.bridgewave.com](http://www.bridgewave.com).
