## **BridgeWave's PicoHaul Wins MobilityTechzone's Third Annual Wireless Backhaul Distinction Award / PicoHaul PG60C Selected for Its Commitment to Innovation Toward the Wireless Evolution**

SANTA CLARA, CA -- (Marketwire) -- 11/03/11 -- BridgeWave Communications, the leading supplier of 4G millimeter wave backhaul solutions, today announced that MobilityTechzone, a global, integrated media site dedicated to mobility and communications sponsored by TMC and Crossfire Media, has named the PicoHaul PG60C high-capacity small-cell backhaul system a recipient of the 2011 Wireless Backhaul Distinction Awards.

Winners of the Wireless Backhaul Distinction Award were selected based upon companies who successfully demonstrated a commitment to innovation toward the wireless evolution.

As 4G networks become a reality, mobile carriers are faced with increasing demand for backhaul capacity to handle data hungry devices in dense urban areas where coverage can be a challenge. BridgeWave's PG60C provides mobile operators with a cost effective and unobtrusive solution for small cell backhaul, or to in-fill network holes between macro base stations that originate from geography, building layout or legacy network planning.

"Winners of the Wireless Backhaul Distinction Awards deserve praise for their extraordinary achievements in the advancement of wireless backhaul technologies," said Rich Tehrani, TMC CEO. "They are the ultimate innovators of 4GWE solutions and we look forward to more innovations in the future."

"BridgeWave is dedicated to providing world class backhaul solutions for carriers and mobile operators," said Amir Makleff, chief executive officer for BridgeWave Communications. "PG60C was developed to tackle emerging 4G connectivity issues and we're committed to driving innovation as new 4G challenges are revealed."

The 2011 Wireless Backhaul Distinction Awards winners are published on the MobilityTechzone web site.

### *About BridgeWave Communications*

BridgeWave Communications is the leading supplier of high-capacity 4G millimeter wave backhaul and gigabit wireless connectivity solutions. BridgeWave's carrier-grade, point-to-point wireless FlexPort® links provide a future-proof mobile backhaul solution for carriers and mobile operators looking to support 4G/LTE/WiMAX adoption. PicoHaul™ links provide the same carrier-grade high-capacity, small-cell backhaul for dense cell deployments. The company's 60 GHz and 80 GHz links offer up to ten times the bandwidth of comparably-priced lower-frequency license-free and licensed-band wireless links, while providing superior interference immunity and data security. Founded in 1999, BridgeWave is headquartered in Santa Clara, California. For more information, visit <http://www.bridgewave.com>.
